

# RMX mixing stand

## Mixing without effort!

### ■ Mixing without physical strain

The RMX takes the equipment load off your hands during mixing. A particular advantage is the gas-pressurized spring, which enables the swivel arm to be raised and lowered with ease.

### ■ Attractively priced alternative

The mixer stand costs far less than an automatic mixing machine. However, the hand-held mixer has to be guided by hand during mixing because automatic mixing is not possible.

### ■ Rugged design

For tough daily use on the building site, securely supported on 4 strong legs.

### ■ Easy handling

Can be set up and taken down in just a few moves.

### ■ Easy to transport

Light in weight and complete with carrying handle.

### ■ Suitable for all Xo / Xo duo hand-held mixers

### Technical data RMX mixing stand

■ Dimensions (bxh) transport position	455 mm x 1180 mm
■ Dimensions (lxbxh) set up	455 x 455 x 1180 mm
